Work Experience

CATALOG ASSISTANT | Amazon, Bangalore, Karnataka May 2022- Present

As a Catalog assistant, I evaluated 400+ ad content daily, achieving a 95% accuracy rate in relevancy ratings which further helps machine learning teams to train their models that enhances ad recommendations. I actively streamlined SOP, reducing processing time and propose process improvements to optimize workflow efficiency while working on side projects.

- Responsible for making and maintaining use case wiki which improved overall teams' accuracy by 7%.
- Organizing and leading standup meeting calls on Mondays to get the insight about the projects and team.
- Regularly organizing team engagement calls for better team collaboration and interaction for both on floor and WFH employees.

JR. PHP DEVELOPER | Authenticode, Mohali, Punjab January 2022- May 2022

As a Jr Laravel Developer, I worked on numerous projects using Laravel added different APIs to the websites including admin panels. Developed and unit-tested RESTful APIs using Postman; integrated custom PHP modules with WordPress for dynamic content handling. My EOD task was to upload updated files in the Git repository.

- Responsible for creating and unit testing the API with postman, ensuring 100% functionality.
- Responsible for the regular GIT repository update.

FULL STACK DEVELOPER | MedClap Pvt. Ltd, Mohali, Punjab March 2021- December 2021

As a solo full stack developer in the startup, I was responsible for developing and doing both white and black box testing for dashboards of multiple websites which ranked 4th in the USA. Updated old WordPress payment gateway with new JavaScript based API. My work included frontend cosmetics, backend integration and to manage the SQL database containing thousands of live entries.

- Solely owned 2 projects end to end supporting 24/7.
- Performed end-to-end testing for dashboards.
- Maintained communication with both tech and non-tech stakeholder.
- Trained 4+ associates on framework, database and testing protocols.
